

INDRAMANI MISHRA

Full Stack Developer (MERN & Next.js)

indramanimishra.es12@gmail.com | +91-7236005136 | Chirag Delhi, Delhi, India

Portfolio: indramani-mishra-portfolio.vercel.app | GitHub: github.com/indramani-1mishra

SUMMARY

Full Stack Developer (MERN & Next.js) with hands-on experience architecting, building, and independently deploying production-grade web platforms. Skilled in real-time systems using WebSocket and Socket.io, and in building WebRTC-based audio/video communication modules. Experienced in end-to-end AWS deployment (self-managed frontend and backend hosting on EC2/S3) and in setting up CI/CD pipelines with GitHub Actions for automated, zero-touch server deployment on every code push. Currently building Safehand Lifecare, a full-stack home healthcare and caregiver management platform, at Safehand Lifecare Private Limited.

SKILLS

Frontend: Next.js 16, React 19, TypeScript, Redux Toolkit, JavaScript (ES6+), Tailwind CSS v4, HTML5, CSS3

Backend: Node.js, Express.js 5.x, RESTful APIs, JWT Authentication, Role-Based Access Control (RBAC)

Real-Time & Communication: WebSocket, Socket.io, WebRTC (RTCPeerConnection, MediaDevices API), STUN/TURN (Google STUN, Twilio TURN)

Database: MongoDB (Mongoose ODM), MySQL

Cloud & DevOps: AWS (EC2, S3 - self-managed frontend & backend deployment), GitHub Actions (CI/CD automation), Hostinger VPS, GoDaddy Server Management, Nginx

Third-Party Integrations: Firebase Cloud Messaging (FCM), WhatsApp Cloud API, Google Maps API, Leaflet, Puppeteer (PDF generation), Payment Gateway Integration (CCAvenue)

Tools: Git, GitHub, Postman, Vercel, VS Code

EXPERIENCE

Safehand Lifecare Private Limited, Full Stack Developer

02/2026 - Present

New Delhi, India (Company formerly known as Tramt Technology Pvt Ltd.)

- Architected and independently developed Safehand Lifecare, a full-stack home healthcare and caregiver management platform, using Next.js 16 and the MERN stack for high performance and SEO.
- Independently hosted and managed both frontend and backend on AWS (EC2 and S3), handling the complete deployment lifecycle end-to-end and maintaining 99.9% uptime.
- Set up a CI/CD pipeline using GitHub Actions so that code pushed to the repository is automatically built and deployed to the production server without manual intervention.
- Implemented real-time features using WebSocket and Socket.io, including live worker location broadcasting to the admin dashboard and instant admin-side updates.
- Built a browser-native WebRTC video calling module (RTCPeerConnection, MediaDevices API) with Socket.io signaling, enabling administrators to conduct remote video interviews and identity verification of caregivers.
- Configured WebRTC ICE candidate resolution using Google STUN and Twilio TURN servers to ensure reliable peer-to-peer connections across different network/firewall conditions.
- Designed a granular Role-Based Access Control (RBAC) system with a custom Express middleware, and a multi-tier JWT authentication scheme using HTTP-Only cookies for Admins, Workers, and Clients.
- Integrated AWS S3 for document storage, Firebase Cloud Messaging for background geo-location tracking, Google Maps/Leaflet for live fleet tracking, and WhatsApp Cloud API for automated notifications.
- Integrated a secure payment gateway (CCAvenue) and automated PDF invoice generation using Puppeteer.

Ekana Technologies Pvt Ltd., Full Stack Developer

09/2025 - 01/2026

Lucknow, India

- Developed high-traffic gaming platforms Superwinnings and TheGameIO using the MERN stack.
- Implemented real-time features and complex state management with Redux Toolkit to handle dynamic gaming data.
- Optimized MongoDB database queries, improving application response time by 40%.
- Live: <https://www.superwinnings.com/> | <https://thegameio.com/>

EDUCATION

Master of Computer Applications (MCA), Maharishi University, Lucknow 2026
Pursuing (Expected 2026)

Bachelor of Computer Applications (BCA), U.P. Rajarshi Tandon Open University 2025
Graduated 2025

PROJECTS

Safehand Lifecare - Full Stack Healthcare Portal 02/2026 - Present

- Designed and developed a comprehensive home healthcare and caregiver management portal using Next.js and the MERN stack.
- Implemented real-time worker tracking and admin notifications using WebSocket/Socket.io and Firebase Cloud Messaging.
- Built an in-browser WebRTC video interview module for remote caregiver verification with STUN/TURN-based connectivity.
- Self-hosted and deployed both frontend and backend on AWS with a GitHub Actions CI/CD pipeline for automatic deployment on every push.
- Optimized frontend performance for 30% faster load time and ensured 100% mobile responsiveness.
- Tech: Next.js, React, Node.js, Express.js, MongoDB, Socket.io, WebRTC, AWS (EC2, S3), GitHub Actions, Tailwind CSS.
- Live: <https://safehandlifecare.com>

Superwinnings - Real-time Gaming & Rewards Platform 09/2025 - 12/2025

- Built a high-traffic dynamic gaming platform with real-time data synchronization using Socket.io.
- Integrated secure payment gateways and reward calculation algorithms.
- Managed complex application state using Redux Toolkit to handle live game updates.
- Tech: React.js, Express.js, Socket.io, MongoDB.
- Live: <https://www.superwinnings.com/>

TheGameIO - Interactive Gaming Web App 10/2025 - 12/2025

- Developed an interactive web application for online gaming with user-specific dashboards.
- Implemented real-time leaderboards and secure transaction history.
- Deployed and managed the application on VPS servers for high availability.
- Tech: MERN Stack, Redux, Node.js.
- Live: <https://thegameio.com/>

E-commerce Business Website 04/2024 - 08/2025

- Created a full-scale e-commerce solution with product listing, cart, and order management.
- Implemented robust user authentication and an admin dashboard for inventory control.
- Deployed the site on a VPS server and optimized for search engine ranking.
- Tech: React, Node.js, MongoDB, Express.js.
